### Flight Training Plan

Cirrus Aircraft strongly believes in the value of regular recurrent training. Cirrus' network of CSIPs and CTCs are experts in Cirrus flight training and we encourage every Cirrus pilot to use an active CSIP or CTC for their recurrent training.

I plan to conduct my next Cirrus recurrent training event with a Cirrus Training Partner on the following date:

\_\_\_\_\_  
Training Date

I am opting out of Cirrus' recommended recurrent flight training program.

### Instructor Recommendations for Future Flight Training

#### Training Due Dates

The following are the due dates for upcoming training events (if applicable)

\_\_\_\_\_  
90 Day Recurrent Check

\_\_\_\_\_  
6 Month Recurrent Check

\_\_\_\_\_  
Flight Review

\_\_\_\_\_  
Instrument Proficiency Check

\_\_\_\_\_  
Medical Certificate

\_\_\_\_\_  
Icing Awareness Course

Cirrus Icing Awareness Course

### Terms of Training

I, the undersigned, have read, understood, and agree with the following:

Transition or differences training is limited aircraft familiarization training and is not inclusive of all the knowledge and skill required for safe flight. I must comply with regulations, exercise sound judgment, and maintain a high level of flying proficiency in order to minimize the risks associated with flight.

The objectives of this course are limited to VFR only. Additional instrument training and completion of an instrument proficiency check in type is required to be capable of safely flying in instrument conditions.

I acknowledge that for my continued proficiency and safety, Cirrus Aircraft strongly recommends that all pilots conduct recurrent training in accordance with the current edition of the Cirrus Syllabus Suite from an approved Cirrus Standardized Instructor Pilot (CSIP) or Cirrus Training Center (CTC).

I acknowledge that my instructor has only observed my flight proficiency during this training for the tasks marked as satisfactory or unsatisfactory and that the tasks required by this training course may not be inclusive of all the knowledge and skill that is required to safely fly under VFR or IFR.
