Instructor Recommendation (If Different)	

Flight Training Plan

Cirrus Aircraft strongly believes in the value of regular recurrent training. Cirrus' network of CSIPs and CTCs are experts in Cirrus flight training and we encourage every Cirrus pilot to use an active CSIP or CTC for their recurrent training.

I plan to conduct my next Cirrus recurrent training event with a Cirrus Training Partner on the following date:

Training Date

I am opting out of Cirrus' recommended recurrent flight training program.

Terms of Training

I, the undersigned, have read, understood, and agree with the following:

Transition or differences training is limited aircraft familiarization training and is not inclusive of all the knowledge and skill required for safe flight. I must comply with regulations, exercise sound judgment, and maintain a high level of flying proficiency in order to minimize the risks associated with flight.

Safely flying under Instrument Flight Rules requires peak levels of skill, sound decision making, and good risk management skills. Many IFR skills degrade over periods of inactivity and each pilot must assess risks for individual flights considering their proficiency levels required to handle forecasted weather, airspace, and other challenges that may arise. Pilots who desire to fly IFR are strongly encouraged to complete an IPC in 6 month intervals, regardless if IFR currency requirements per regulations are complied with.

I acknowledge that for my continued proficiency and safety, Cirrus Aircraft strongly recommends that all pilots conduct recurrent training in accordance with the current edition of the Cirrus Syllabus Suite from an approved Cirrus Standardized Instructor Pilot (CSIP) or Cirrus Training Center (CTC).

I acknowledge that my instructor has only observed my flight proficiency during this training for the tasks marked as satisfactory or unsatisfactory and that the tasks required by this training course may not be inclusive of all the knowledge and skill that is required to safely fly under VFR or IFR.
